

Ploetz + Zeller GmbH is an agile and innovative software product and consulting company in the field of BPM. With our products Symbio and movmint we digitize and dynamize the integrated process management system. In this way we are working together towards the goal of establishing an automated and assistance-based management system for our customers. Our customers range from large DAX corporations to small innovative SMEs.

We are looking on a full-time basis for our locations Dortmund, Munich or Home-Office a

Senior Consultant – Business Process Management (m/w/d)

for the support of our innovative BPM customer projects

You enjoy

- Advising our (major) customers responsibly
- Helping to shape the success of customer projects with ideas and creativity
- Dealing with innovative technologies and concepts
- methodically and analytically developing new requirements and solutions with your customers/partners

We would like to get to know you, if

- You have knowledge and experience in process or quality management
- You have a high enthusiasm for new trends, innovations & digitization
- You approach customer challenges in a structured way and develop new solutions together with customers.
- You actively identify yourself with our customers and appreciate the communication with customers/partners very much.
- You like to break new ground in consulting and have a passion for business process management.
- You have a degree in Business Informatics, Business Administration, etc.
- You have a good affinity for IT topics
- You like to accompany customer projects and help customers achieve their goals
- Ideally you are multilingual and have at least a very good command of German and English.

You can expect

- a completely agile team with intrinsically motivated colleagues and flat hierarchies
- a flexible working environment, the ability to work independently and a flexible place to work
- a modern and trend-setting range of topics and tasks, such as the implementation of customer workshops, the introduction of BPM and our products movmint & Symbio, the creation of concepts in the BPM environment, SAP and Microsoft implementation projects, etc.
- International and global projects in very attractive countries
