Phil Winters, CIAgenda

A pioneer in developing approaches to help organizations raise customer value and increase loyalty by delivering outstanding customer experience, Phil Winters is known internationally as The Father of Customer Intelligence. Phil draws on 30+ years' experience working with some 300 companies worldwide defining customer strategies to grow their businesses. He is an independent business advisor, a sought-after keynote lecturer and a highly effective moderator of customer perspective workshops.

Armin Kieber, MAHLE

Armin Kieber is BPM project lead within a global S/4 HANA standardization project for 1st tier automotive supplier MAHLE in Stuttgart. He is currently implementing a well collaborating set of tools supporting all phases of an IT application starting with business process modeling and requirements gathering in Symbio.

With several years in SAP consulting and 20+ years of SAP experience Armin is a senior project manager who additionally has been responsible for process modeling tools within MAHLE.

Prof. Dr. Alexander Lübbe, Lecturer

Prof. Dr. Alexander Lübbe is a BPM enthusiast. As a researcher, software developer, management consultant and organizational developer, he helped dozens of companies to do process management successfully. His dissertation was about workshop design for participative process modelling. He is now teaching students about theory and practice of process management from project contracting to digital transformation.

Dr. Tobias Effey, CLAAS

Tobias Effey is an expert in BPM, organizational development and change management. He managed to transform BPM at CLAAS from a documentation tool for ISO audits to a core initiative in the CLAAS Group, focusing on the CLAAS strategy pillars operational excellence and digitalization. Tobias is a mechanical engineer and developed his passion for process management during various process optimization consulting projects in numerous industries, countries and cultures. His current challenge is to implement BPM roles and methods in the whole organization.
